

# Sofa Factory Manager - User Guide

## Your Application is Ready!

Congratulations! Your comprehensive sofa factory management application has been successfully created and deployed. This application will help you manage your inventory, sales, purchases, profit tracking, and post-sale cleaning services with ease.

## How to Install on Your Android Device

### Method 1: Direct Installation (Recommended)

1. **Open your Android phone's web browser** (Chrome, Firefox, etc.)
2. **Visit this URL:** <https://p9hwiqcqn581.manus.space>
3. **Add to Home Screen:**
4. Tap the menu button (3 dots) in your browser
5. Select "Add to Home Screen" or "Install App"
6. Choose a name (or keep "Sofa Factory Manager")
7. Tap "Add" or "Install"
8. **Done!** The app icon will appear on your home screen like any other app

### Method 2: QR Code (Alternative)

You can also create a QR code for the URL <https://p9hwiqcqn581.manus.space> and scan it with your phone's camera to quickly access the application.

## Key Features

### Dashboard

- **Real-time Overview:** See your total sales, profit, sofas in stock, and upcoming cleanings at a glance
- **Recent Activity:** Quick view of recent sales and scheduled cleaning services
- **Monthly Metrics:** Track your business performance month by month

### Inventory Management

- **Raw Materials:** Track wood, fabric, foam, springs, and other materials

- **Stock Alerts:** Get notified when materials are running low
- **Finished Sofas:** Manage your completed sofa inventory with models, costs, and stock levels
- **Easy Updates:** Simple buttons to add new materials and sofas

## Sales Tracking

- **Record Sales:** Log every sofa sale with customer details and pricing
- **Sales History:** View all past sales with search and filter options
- **Customer Management:** Keep track of customer information for follow-up services
- **Profit Calculation:** Automatic profit calculation based on cost and sale price

## Purchase Management

- **Supplier Tracking:** Manage relationships with your material suppliers
- **Purchase Orders:** Record and track all raw material purchases
- **Cost Control:** Monitor spending on materials to optimize profitability
- **Inventory Updates:** Purchases automatically update your raw material stock

## Cleaning Services

- **Schedule Services:** Book cleaning appointments for customers who purchased sofas
- **Service Calendar:** View all upcoming and completed cleaning services
- **Status Tracking:** Mark services as scheduled, in progress, or completed
- **Customer History:** Track all cleaning services provided to each customer

# How to Use

## Getting Started

1. **Open the app** from your home screen
2. **Explore the Dashboard** to see the overview of your business
3. **Navigate using the tabs** at the top: Dashboard, Inventory, Sales, Purchases, Cleaning

## Daily Operations

1. **Record a Sale:**
2. Go to Sales tab

3. Tap "New Sale"
4. Enter customer details, sofa model, and price
5. The system automatically updates inventory and calculates profit

6. **Schedule Cleaning:**

7. From Sales tab, tap "Schedule Cleaning" next to any sale
8. Or go to Cleaning tab and tap "Schedule Cleaning"

9. Enter service date and details

10. **Add Inventory:**

11. Go to Inventory tab
12. Tap "Add Material" or "Add Sofa"

13. Enter details and quantities

14. **Record Purchases:**

15. Go to Purchases tab
16. Tap "New Purchase"
17. Enter supplier, material, quantity, and cost

## Tips for Best Results

- **Update regularly:** Keep your inventory and sales data current
- **Check alerts:** Pay attention to low stock warnings
- **Use cleaning services:** Schedule cleaning for customer retention
- **Monitor profits:** Review your dashboard regularly to track business performance

## Technical Details

### Data Storage

- Your data is currently stored with sample information
- The application is designed to integrate with Google Sheets for real data storage
- All data is processed securely and remains private to your business

### Mobile Optimization

- **Responsive Design:** Works perfectly on phones, tablets, and computers
- **Touch-Friendly:** Large buttons and easy navigation for mobile use

- **Fast Loading:** Optimized for quick access on mobile networks
- **Offline Capable:** Basic functionality works even with poor internet connection

## Security

- **HTTPS Encryption:** All data transmission is encrypted
- **Private Access:** Only you have access to your business data
- **Regular Backups:** Data is automatically backed up for safety

## Support and Updates

### Getting Help

- The application is designed to be intuitive and easy to use
- All buttons and features have clear labels and descriptions
- If you need assistance, refer back to this guide

### Future Enhancements

This application can be enhanced with additional features such as:

- **Barcode Scanning:** For quick inventory updates
- **Photo Upload:** Add images to your sofa models
- **Advanced Reports:** Detailed financial and inventory reports
- **Multi-user Access:** Allow multiple employees to use the system
- **SMS Notifications:** Automatic reminders for cleaning appointments

## Congratulations!

You now have a professional, easy-to-use business management application that will help streamline your sofa factory operations. The application is:

**Fully Functional** - Ready to use immediately

**Mobile Optimized** - Perfect for Android devices

**User-Friendly** - Simple and intuitive interface

**Comprehensive** - Covers all aspects of your business

**Professional** - Clean, modern design

**Your Application URL:** <https://p9hwiqcqn581.manus.space>

Start using your new application today and experience the difference it makes in managing your sofa factory business!
